www.birlamedisoft.com info@birlamedisoft.com

Our History

Establishing itself as brand in the Healthcare industry

An ISO 9001:2008 & ISO 27001:2013 & CMM Level 3 Certified Company, operational since 2001. Personal attention of Managing Director & CEO in all the operations The minds behind the developments comprise of a Doctor, MS (OBST & Gynae) and highly experienced Software professionals, who know all the medical & software development terms and have the ability to drive the software in a minute as per the needs of the organization. The company also hires experts from other fields while designing the healthcare application software

Our tryst with the healthcare industry began right from the inception of the Company itself under the guidance of Dr. Upma Birla (MS Gynaecologist), Managing Director and Mr. Shrinivas Birla, Chief Executive Officer. With expertise in healthcare domain, information technology and management, the company today has over **10000+** satisfied customers across the World. In fact team Birlamedisoft's solutions are now a favourite amongst various Hospitals, Diagnostics centres, Laboratories, Clinics, Pharmacies and many more healthcare organisations

What We Do

Endeavouring to innovate offerings including **Hospital management, Diagnostics and Laboratory managment, Blood Bank management software, PACS software** and a complete range of health care management softwares.

Team Birlamedisoft builds each software with the aid of cutting age technologies and also provides a user friendly interface to make it easy for the doctors to perform their tasks

STRATEGY

Vision

"Our vision is to empower every Healthcare Professional with the 'Power of the Computer'. We make computer software that is Usable, Comprehensible and Affordable to the Healthcare Professionals, running small or big practices anywhere in the world."

Mission

Talking about the company's mission, the CEO, says, "Our mission is to write 'Doctor Friendly' programs for Healthcare Professionals and to make Birlamedisoft a ubiquitous healthcare software brand that is synonymous with the best in quality and the most useful healthcare software programs. It has to be the brand of choice

Core Values

- **Integrity:** We are principled, honest, and ethical, and we do the right thing for those we serve.
- **Trust:** We count on and support one another individually and as team members.
- **Excellence:** We perform at the highest level, always learning and looking for ways to improve.
- **Accountability:** We accept responsibility for our actions, attitudes, and health.
- **Mutual Respect:** We embrace diversity and treat one another with dignity and empathy.

BUSINESS

Birlamedisoft is delivering healthcare solutions to make smart hospitals with top of the line web enabled HIS software & hospital consultancy services which will give additional helping hand for hospitals to benefit from smart hospital concepts where the gap between patient and the doctors will reduce..

Business Strategy

Birlamedisoft is delivering healthcare solutions to make smart hospitals with top of the line web enabled HIS software & hospital consultancy services which will give additional helping hand for hospitals to benefit from smart hospital concepts where the gap between patient and the doctors will reduce..

SUB: Quanta v3.0 -HIMS SOFTWARE FEEDBACK – SHPHA MENDI

This is to inform your office that the Quanta v3.0 or HIMS system is a hospital information management system that is integrated with more than 23 modules which communicates or links to each other very smoothly and is easy to use as it is user friendly.

We,SHPHA are going ICT and this HIMS system strengthen us and showing us way to move forward and leads us to step ahead up of other hospitals which are operating manually. It also helps us to manage all the patient's information by replacing the patient admission chart with one of the module of the system and is more effectively used by the doctors and nurses.

At the beginning, we trained all the staffs on how to use the HIMS system for few weeks and was a bit difficult but after continuous training and use of the system, they are now able to use the system by themselves.

It's not that expensive and costly as you can think to set up the system as it will help in return in the areas where we spend most of our time, effort, resources and record keeping. The system captures every process of hospital management, patient treatment, HR & Payroll systems, Accounts systems, Pharmacy and the list goes on.

However, the system is recommended to be used in any hospital systems and can help improve the hospital standards of operating. It will be a credit and bonus to the hospital when it is utilized and used by the management.
