Birlamedisoft™
Computing Beyond Imaginations
Since 2001....

Established in 2001, Birlamedisoft has pioneered various solutions for developing software for the Healthcare industry. From its very onset, the company has proved itself to be a trusted brand for its end-to-end solutions in better and affordable ways as compared to other service providers in the domain.

Talking about the company's mission, Mr. Shrinivas Birla, the CEO, says, "Our mission is to write 'Doctor Friendly' programs for Medical Professionals and to make Birlamedisoft a ubiquitous medical software brand that is synonymous with the best in quality and the most useful medical software programs. It has to be the brand of choice and its brand equity must reflect the values associated with the brand."

"Our vision is to empower every Healthcare Professional with the power that technology brings."

Indeed the company's performance over the years depicts the team at work's immense dedication to empower every healthcare professional with the 'Power of the Computer' by creating computing software that is Usable, Comprehensible and Affordable to every healthcare professional, running small to big practices anywhere in the World.

Establishing itself as a brand in the Healthcare industry

It goes without saying that Birlamedisoft has established itself as a brand in the healthcare industry. With expertise in the healthcare domain, information technology, and management, the company today has over 10,000+ satisfied customers across the World. In fact, team Birlamedisoft's solutions are now a favourite among various hospitals, laboratories, clinics, pharmacies, blood bank and other healthcare facilities.

Products & Services

Quanta-HIS, Maxim-LIS, NetBloodBank, Maxim-PACS, EpathLab, EPhysician, EPharmacy, Histopath Labs, Specialised EMR, IVF Centres, Dialysis Centres, HIV Specialised Centres, Imaging Centres, Specialised Software for Cancer Hospitals, Specialised Software for Occupational Health Industry, and many more tailor-made software solutions for the entire healthcare industry.

Birlamedisoft is proud to introduce a masterpiece to their collection of medical software. Our latest offering is in the form of NetBloodBank, Web-based Blood Bank Management Software for managing Blood Bank administration using cloud and web based technology. This is a value added program that comes preloaded with a host of features, many for the first time.

What is NetBloodBank?

As the name suggests, the 'NetBloodBank' is a web based Blood Bank Management Software used on the internet. This is a brilliant software to computerise blood banks and blood transfusion centres from medium to large enterprises. Information availability is not just limited to one centre; but it is available across the World once you login to the system. It helps blood banks to prepare all its registers like master register, donor register, issue register etc. There are more than 50 registers generated through this software. It computerises Reporting, Billing, Inventory, and Accounting functions of Blood banks.

NetBloodBank Features

- Database driven. Accurate database / Record management
- Detailed Blood Bag Database
- Donor Database- Blood Group wise and Area wise.
- Maintain and Update Unique Donor Identification
