Why should you choose Quanta OccuCheck Web HIMS Industrial Version, Hospital Information Management System over other HIS systems available in the market today???

Please find some unique facts.

Features	Features available in Quanta OccuCheck	Features available in Other HIS Softwares
 Less Maintenance	Quanta OccuCheck WebHIMS needs very little maintenance cost. The maintenance is almost none.	Maintenance is heavy.
 Connect multiple branches easily.	Quanta OccuCheck WebHIMS allows you to operate through multiple branches connected to a central server.	No centralized database connectivity. All branches are separate.
 Access software from anywhere, anytime	Quanta OccuCheck WebHIMS is available anywhere, anytime.	You have to go to hospital to access your software.
 Remote support system never allows breakdown	Quanta OccuCheck WebHIMS maintenance can be performed remotely. Zero hrs. of downtime guaranteed.	Lot of breakdowns, crashes, operating system issues, virus problems and many many headache things, thus longer downtime is absolutely evident
 Never Slows down, browser based software	Quanta OccuCheck WebHIMS is a browser based software. It runs on type of browsers and all Operating system platforms.	Traditional windows based software. Running through desktop applications. Software needs to install on every computer system.
 Easily upgradable	Quanta OccuCheck WebHIMS Up gradation is easy and through the web instantly.	Takes long long time to upgrade software. The upgrade has to be ported in each and every computer. Imagine you have multi computers, you have to update in each and every PC.
 Plug and Play System	Quanta OccuCheck WebHIMS is a plug and play system. It runs on unlimited numbers of computers in LAN and WAN network. Just connect any computer and operate it.	Limited computers availability. If you need to increase computers, you will have to call vendor, pay extra charges, wait for upgradation, invest huge amount which is hidden charges not known in advance.

Features	Features available in Quanta OccuCheck	Features available in Other HIS Softwares
 Complete Database driven	Quanta OccuCheck WebHIMS is purely written in parameters style. No hard coding anywhere. Customizing Quanta V2.0 WebHIMS is very easy.	Complete complex structure. Hardcoded things which are difficult to modify by user. Everytime you will be dependent on vendor to change things for you.
 Quanta Billing System	Quanta OccuCheck WebHIMS covers all types of billing, Cash, Insurance, Corporate, billing system. Also Introducing new billing system is a breeze in Quanta V2.0 WebHIMS	Limited billing system. Hardcoded billing patterns. If you want to introduce new billing pattern, contact vendor again and again.
 Integrated with all depts. of hospital	Quanta OccuCheck WebHIMS is fully interconnected software with all depts.. Information flows from one dept to another in seamless way.	Interconnection is not known at all. Everywhere you will have to duplicate information again and again. No single entry and exit system found.
 No papers, complete EMR record online	Quanta OccuCheck WebHIMS makes hospital paperless. Complete Electronic Medical Record information is available instantly, Anywhere & Anytime.	What is called as EMR is not known to many HIS available today in market. They just provide you a small, tiny billing system.
 Patients can be registered from any location.	Quanta OccuCheck WebHIMS makes possible to register patients from remote location. Local congestion can be avoided. Get preregistration done of patients before arriving in a clinic.	Cannot register patient information from remote location. This most important feature is missing in other HIS software.
 Ease of Use	Quanta OccuCheck WebHIMS is very easy to operate, any novice user can operate it..	Very complex screens, you will have to refer help files again and again. Do not understand what is actually called as HIS.
